[illegible]

The scatter plot displays the relationship between the number of years since the last election (X-axis) and the number of years since the last election (Y-axis). The X-axis ranges from 0 to 10, and the Y-axis ranges from 0 to 10. Data points are labeled with '£' (representing a specific value) and 'œ' (representing another value). The points are scattered across the plot, with a notable cluster of '£' points along the diagonal line where X=Y.
